Double

Laundry Basket

The Double Laundry basket is ideal for people who find that space is at a premium.

It is ideal for storing dirty laundry and also as a method of carrying the laundry around the house or to the clothes line. The mesh side panels allow for maximum airflow and ventilation. The two straps on the basket allow for easy transport of clothing. The added compartment also makes separating the coloured items from the whites easier than ever before.

When not in use the Double Laundry Basket cleverly folds away to be stored out of sight.
