Clothes Peg (12pack)

Rotting Wood, Rusting Springs,
Fallen clothespegs!!!

These are all problems that have just been accepted by people when it comes to their clothes pegs. Until now!

The Green Peg's innovative design means that pegs need never fall from the line again. Thanks to the specially formulated, flexible weatherproof material, these pegs are extremely easy to use and make taking the clothes in from the line simpler than ever before. All you have to do is "Pull and Run" allowing the pegs to just hang there.

The design for the Green Peg originated from our team as a way to tackle the environmental issue of the amount of regular pegs that are disposed of every year. The Green Peg solves this disposal problem and are literally "the last pegs you'll ever need to buy".
